

Find your *bracelet size*.

Measure your wrist snugly, then add a comfort gap. Divoti bracelet sizes are the full length of the bracelet, tag and clasp included, so the size you order is your wrist plus the gap.

STEP 1 · MEASURE YOUR WRIST

1

Grab a tape

Use a soft tape, or the printable sizer on page 2. String and a ruler also work.

2

Wrap it snugly

Wrap the narrowest part of your wrist, just above the wrist bone. Flat on the skin, snug but not tight.

3

Read the number

Read where the end meets the scale. That's your snug wrist size. Measure twice.

STEP 2 · ADD YOUR COMFORT GAP

BRACELET THICKNESS	TIGHT (MINIMUM)	SNUG FIT	LOOSE FIT
5 mm or less	Add 3/8"	Add 1/2"	Add 3/4"
More than 5 mm	Add 3/8"	Add 3/4"	Add 1"

3/8" is the minimum for any bracelet: a tight, barely-there fit. Most people choose snug. Choose loose if you like to flip the tag to read the back. Thickness is listed on each product page.

STEP 3 · CHECK IT

Example

6.5" snug wrist + 1/2" (chain under 5 mm, snug fit)
= order a 7" bracelet.

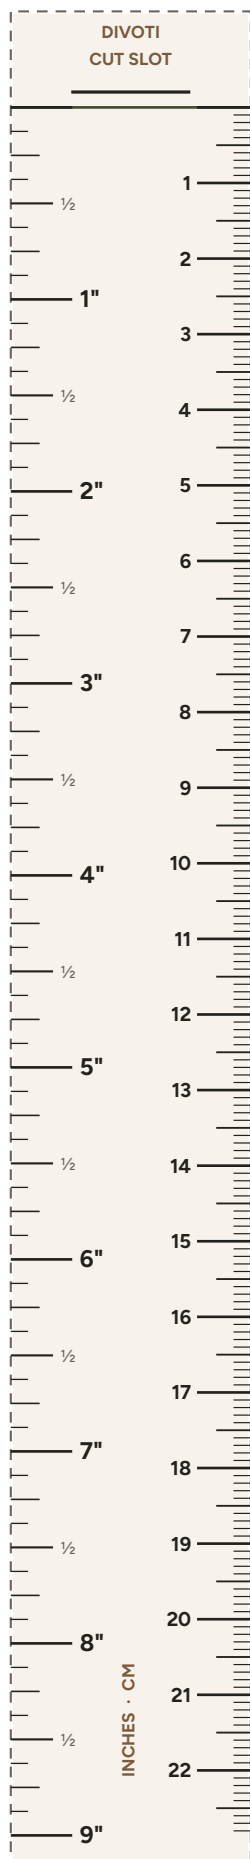

Two-finger rule

Wrap the tape at your new size. Two fingers should slide under it comfortably.

Not sure? We'll check your size for you.

Email your snug wrist size and preferred fit to support@divotiusa.com. We recreate it on our wrist gauge and recommend a size. Prefer not to measure? Choose an adjustable or trim-to-fit silicone band.

Size exchanges: engraved items can't be returned, but the band can be exchanged for another size within 7 days of receipt, in new condition. Customer pays shipping both ways.

DIVOTI · PRINTABLE WRIST SIZER

Print, cut, *wrap*.

PRINT AT 100% / "ACTUAL SIZE"

Turn off "Fit to page" or "Scale". Then check the 1-inch square below before you measure.

Calibration check: this square should measure exactly 1" (2.54 cm) on each side. A standard credit card is 3 3/8" wide; it should match 3 3/8" on the sizer.

1 Cut it out

Cut along the outer dashed line. Cut the slot at the top open along the short line.

2 Wrap and thread

Wrap the strip around the narrowest part of your wrist, numbers facing out. Thread the end through the slot.

3 Pull snug

Pull until it's snug but not tight and lies flat on the skin.

4 Read your size

Read the number at the slot's edge in inches or centimeters. Then add your comfort gap from page 1.

My snug wrist size

+ comfort gap

= bracelet size to order

Cut on the dashed line
